Atlanta, GA | (678) 693-0405 | fabiola.aurelien@gmail.com | [LinkedIn](#) | [Portfolio](#)

SOFTWARE ENGINEER | FULL-STACK (MERN) | AI-NATIVE DEVELOPMENT

Full-stack Software Engineer with hands-on experience building modern web applications using React, TypeScript, Node.js, Express, MongoDB, and REST APIs. Combines enterprise systems programming experience with contemporary AI-assisted development practices, leveraging tools such as Codex, GitHub Copilot, and ChatGPT to accelerate implementation, improve productivity, and deliver high-quality software. Adept at working across frontend, backend, and data layers while maintaining strong focus on user needs, software design, testing, and maintainable code. Known for analytical thinking, technical curiosity, and delivering results beyond traditional experience boundaries.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C/C++, Java
- **Frontend:** React, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Backend:** Node.js, Express.js, RESTful APIs
- **Databases:** MongoDB, Mongoose, SQL
- **Tools:** Git, GitHub, VS Code, Postman, Vite
- **Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC
- **AI & Development Tools:** OpenAI Codex, GitHub Copilot, ChatGPT, AI-assisted development workflows, prompt-driven software development.
- **Testing:** Unit & Integration Testing
- **Python:** Currently developing proficiency in scripting & automation

SOFTWARE ENGINEERING EXPERIENCE

R4B Design Studio (Capstone) | [Live Demo](#) | React, TypeScript, Node.js, Express.js, MongoDB, JWT Auth

- Designed and developed a full-stack business management platform supporting client inquiries, project tracking, task management, and administrative workflows
- Built secure authentication and role-based access using JWT, protected routes, and RESTful API architecture
- Developed responsive React and TypeScript interfaces integrated with Node.js, Express, and MongoDB backend services
- Implemented CRUD functionality across multiple business entities, enabling end-to-end project lifecycle management
- Leveraged AI coding agents including OpenAI Codex and GitHub Copilot for implementation, debugging, testing, refactoring, and code review while maintaining full ownership of design decisions and code quality.

React Task Dashboard | [Live Demo](#) | React, TypeScript, Bootstrap, Chart.js

- Engineered an interactive dashboard application using React and TypeScript with reusable component architecture and typed state management
- Implemented dynamic task workflows including CRUD-style interactions, filtering, and search to support responsive user experiences
- Integrated calendar and visualization components to surface task metrics and improve data-driven interaction
- Applied modern frontend engineering practices to deliver maintainable, scalable, and user-focused interface design

Wanderlust Travel Tracker | [Live Demo](#) | REST API, TypeScript, Node.js

- Built a full-stack travel tracking application integrating external APIs for real-time country data
- Implemented filtering, tracking, and journaling features with persistent state management
- Designed responsive UI with search functionality and dark mode
- Structured modular, maintainable code using component-based architecture

GenAI Flashcards Study App | [Live Demo](#) | JavaScript, HTML, CSS

- Built an AI-assisted flashcard application leveraging generative AI and AI development workflows to accelerate content generation and enhance user learning experiences.
- Implemented navigation, validation, and filtering features to improve user experience
- Enhanced performance and accessibility across core application workflows
- Applied interactive study workflows with responsive UI and real-time feedback to enhance user learning

PROFESSIONAL EXPERIENCE

Real Estate Investor — Self-Employed | 2023–Present

- Managed full project lifecycle from planning to delivery, coordinating cross-functional teams
- Delivered projects on time and within budget while maintaining quality standards
- Conducted financial and market data analysis to evaluate investment opportunities, acquiring 3 properties exceeding target ROI benchmarks
- Built ROI models, budgeting tools, and risk assessments to guide acquisition and renovation strategy

Math & Data Consultant — Self-Employed | 2012–2023

- Leveraged Excel, Tableau, and SQL to build custom dashboards and reporting systems for K-12 schools, educational organizations, and small businesses to identify gaps and inform decisions
- Conducted quantitative and trend analysis on large datasets to surface actionable insights, reducing decision-making time for stakeholders
- Developed automated reporting systems and dashboards to communicate KPIs and program outcomes to executive leadership and board-level audiences
- Facilitated training workshops for 10+ staff members, translating complex data findings into clear, actionable strategies that improved operational efficiency

Systems Programmer / Analyst — Worldspan | 1999–2001

- Developed and maintained high-volume transaction systems using C and Assembler
- Improved system performance, reliability, and data integrity in enterprise environments
- Executed system testing and supported large-scale production migrations
- Authored and maintained technical documentation and system specifications to support maintainability and cross-team collaboration

EDUCATION

Per Scholas – Software Engineering Program (2026)

Full-stack development: React, Node.js, REST APIs, MongoDB

Georgia Institute of Technology – Object-Oriented Development Certificate

Georgia State University – M.Ed., Mathematics

Spelman College – B.S., Mathematics (Computer Science Concentration)

Relevant Coursework – *Data Structures & Algorithms, Computer Organization & Design, Operating Systems, Discrete Mathematics, Object-Oriented Programming (C++)*
